Dear Sir:

This is in reference to case # 92-471.

When I called your office, the man I spoke with knew nothing about this tower. He gave me another number to call but I could not get an answer on that line.

Here are a few questions I have concerning the tower.

Are there any possible health problems connected with this type of transmission?

Will it affect cordless phones?

Will it affect TV reception? (My husband is ill and this is his only recreation in winter.)

Will it affect satellite dish reception? The tower will be located SE of our property. Several of the satellites we pick up are located to the SE of our dish.

Will it attract lightning?

If our home is located between this tower and another, will it heighten any problems that may exist?

Any and all answers you can give will be appreciated.

Please file my letter in case # 92-471.

Thank you,  
Mrs. Don Campbell
